

Proceeding: 04-233
Section: 12

To Whom It May Concern:

It has come to my attention that certain dealings are in process of eliminating established radio stations from using the lower band frequencies. The radio station I am referring to is K-LOVE. I do not believe it would be in the best interest of the FCC to carry out this "move over little guy attitude". This radio station has been and is established in many communities providing a positive message that helps me as well as many other people in the United States, as well as the world, deal with the everyday grind. It does this without profanity, rudeness, sexual innuendoes and classes taste. If removed from its ability to broadcast using the lower FM bands, this message will be lost all because of "money". I believe the message that K-LOVE represents and continually sends out over the airwaves is worth far more the dollar and cents. If K-LOVE is forced to abandon its current broadcasting over the lower FM, the FCC has done a great injustice to the American people.
